About Us

A Prestigious School Serving Jamnagar for 21 Years.

The seed of Sodha School Jamnagar has planted in 1998 with the commitment of quality education and education for all with physical, educational and cultural development of student. At present Sodha School is a mammoth tree that has strong roots with ethical values and integrity.

We value our commitment towards quality education along with complementing aspects of self-reliance, peer interaction, and individual growth. India required educationally qualified population to transform the nation from developing to develop country for that we are committed to provide best education with best facilities to the student. Our system is unique in the sense that it has been carefully designed to ensure that every student is prepared to face the ever-changing challenges of the society.

Sodha school achieves best results in board examination and became a part of growth story of student and pillar for achieving dreams of parents. Our school concentrates on all over development of student rather than only focusing to educational part. Practical knowledge is the most important part for continuous learning and for that we are strives our best.

Our team of teachers is highly qualified with internal core values, they are always encouraging students to have compassion for one another by teaching them to listen to and value each other's opinions in and outside of the classroom. As teacher they play a crucial role in helping to influence student and shape their lives.

We should not judge a book by the cover and a child from his report card. Sodha School is working on all round development of child, it will take years to show some tangible results, but there is considerable progress in this direction.

Director's Message

It gives us great pride and pleasure to write about Shree Sodha Ranjitsinhji Education Group, Jamnagar which is unique in itself with state-of-the-art infrastructure and facilities to meet the need and requirement of moulding the child of 21st century for an inclusive society.

Each child is born with a mission in his life and with special talents which are peculiar to him. The purpose of education is to transform the inborn potentiality into an actuality. There are three strands to good learning i.e. to be competent (intellectually), to be engaging (socially) and to be ethical (morally). The system of education should be competent to match the parameter of modern requirement. Education system is ever changing and challenging process. With the passage of time and specific requirement the method of educating will change. The challenge right now with us is embracing modern schooling methods without forgetting our time tested teaching techniques to provide world class education.

Another main aspect of school is its environment, where a positive school environment is defined as a school having appropriate facilities, well-managed classrooms, available school-based health supports, and a clear, fair disciplinary policy. There are many hallmarks of the academic, disciplinary, and physical environments of schools with a positive climate.

The Illiterate of 21st century will not be those who cannot read or write but those who cannot learn, unlearn and relearn, our motto is to make a student best in his field that can face all the challenges whether it is a field of career or a social life.

Mission:

We prepares students to understand, contribute to, and succeed in a rapidly changing society, thus making the world a better and more just place. We will ensure that our students develop both the skills that a sound education provides and the competencies essential for success and leadership in the emerging creative economy. We will also lead in generating practical and theoretical knowledge that enables people to better understand our world and improve conditions for local and global communities.

Vision :

We are and will be a school where design and social research drive approaches to studying issues of our time, such as democracy, urbanization, technological change, economic empowerment, sustainability, migration, and globalization. We will be the preeminent intellectual and creative centre for effective engagement in a world that increasingly demands better-designed objects, communication, systems, and organizations to meet social needs.

Our vision aligns with shifts in the global economy, society, and environment, which animates our mission and our values:

- Creativity, innovation, and a desire to challenge the status quo will affect what and how we teach and the intellectual ambitions of the university itself. □ Social engagement should orient students' academic experiences to help them become critically engaged citizens, dedicated to solving problems and contributing to the public good.

- Our School must embrace these principles and innovate to address shifts in the global economy, society, and environment that require individuals to grapple with complex problems, pursue more fluid and flexible career pathways, and collaboratively create change.

Path To Bright Future

“Here we can see the result of education in student’s RESULT as well as in their LIFE also.”

“We are not finding the BRIGHT students but we are making BRIGHT students.”

Path To Bright Future
